

**STATE LIBRARY  
OF IOWA**

From the State Library - January 17, 2019

## Brainfuse Implementation Update

The State Library implementation team has been meeting with Brainfuse since the contract was signed. This is what we know so far about getting Iowa libraries up and running:

- Brainfuse will create separate accounts for all public and academic libraries and all IowaWorks centers. Each library and IWC's will be assigned a unique link. Once the accounts are created, Brainfuse will send all libraries their launch emails with promotions and individual unique links.
- All individual, unique library links will be for open access (no authentication required), but restricted by geolocation to the state of Iowa. This will accelerate and significantly simplify the implementation process for each library as they will only need to place the link onto their website.
- Brainfuse estimates the development time for account creation will be at least two weeks. In the meantime, use this trial access to take a look at the products.
